Description

Real Watch For Lifestyle. It's the first 2K HD 1296P IR watch camera in the market. IR (Night Vision) Activated Automatic in the dark. Additionally, the spy watch actually works and functions as a common watch.

At the same time, it delivers covert surveillance that no one will suspect. Behind the watch face, there is a HD hidden camera which can record 1296P high definition video and audio. It can also take still images with the press of button, everything you record gets stamped with the date and time. Additional, it can also support separate audio recording, you can use it as a voice recorder.
