

BUG SURVEILLANCE

- ☒ Convenient and comfortable
- ☒ Voice Monitor or Surveillance
- ☒ Voice Callback
- ☒ Standby Up to 5 to 7 Days
- ☒ Small Size & Simple Operation
- ☒ Support To Any Telco Line Simcard

Description

This type of device is named Bug Surveillance and commonly known as a “voice-activated” or “live streaming bug surveillance device”. It typically operates by using a SIM card and can be hidden in inconspicuous objects such as a pen or a USB drive.

Once the device is activated by a call, it will begin recording and transmitting the audio in real-time to the user on the other end of the call. This makes it a useful tool for covert surveillance or monitoring

Product Features :
