

HI-TECH DIGITAL BINOCULAR WITH NIGHT VISION

- ☒ Tactical Light
- ☒ Wide Angle Eyepiece
- ☒ FOV= 13Degree
- ☒ 8X Digital Zoom
- ☒ 2K Image Quality

Description

The night vision device adopts special amplification technology to improve visual clarity. The image is clear, the picture quality is clear, and the viewing is comfortable. Use 3W 850nm infrared light, 3-level infrared adjustable strong infrared spotlight, full night vision range: 600m infrared adjustment, clearer field of view when night falls. 8x digital zoom allows for clear observation of the day even at a distance, making it suitable as a telescope for clear long-distance observations. At night, it provides high-definition night vision.

Main uses: Hunting, Reconnaissance, Security and Surveillance, Camping fun, Cave exploration, Night fishing and Boating, Wildlife observation, outdoor activities, night activities, etc.

Product Features :
